ESSAY (To be attached)

2026 marks the 250th anniversary of the signing of the Declaration of Independence. There is a direct correlation between the Declaration and the 17th-century European Enlightenment, which transformed concepts of humanity, science, governance, and reason. The ideas of England's John Locke, particularly the social contract and natural rights ("life, liberty, and property"), inspired European military and political figures to support the American Revolution by portraying it as a righteous fight against tyranny. Kazimierz Pulaski of Poland was among the Europeans who supported the Colonies' cause, and came to North America at the behest of Benjamin Franklin.

Essay: In 2000-2500 words, analyze Pulaski's strategic and symbolic contributions to the Continental Army and the establishment of American Independence.
